

Welcome to EverMed Direct Primary Care

How to DPC

Direct Primary Care

Direct Primary Care is a method of accessing primary care for a fixed, low monthly fee. With Direct Primary Care, the focus of healthcare is returned to you the patient and your family. No more visit-focused care, but rather patient-focused care. No more Co-pays for Primary Care.

What is EverMed Direct Primary Care?

- No Co-pays
- No Coinsurance to pay
- Covers all standard Primary Care services (see Schedules 1 and 2)
- Multiple symptoms can be addressed in a single visit
- Multiple family members can be seen in a single visit
- Telemedicine available—receive care on the road or from home when appropriate

How does DPC help my family and I?

- With no co-pays, the barriers to care are stripped away. Clinicians are no longer paid to see you, they are paid to *help* you.
- Open access to care means you do not need to delay seeking care, the goal is to get and to keep you healthy.
- Your physician will guide you to the right care, at the right time, at the right type of facility.

Where do I go for care?

- You will select a home primary care physician. They will be your go to or your “champion for care” for you and your family.
- Most EverMed DPC members have secondary insurance. For services outside of primary care, consult your plan’s network.
